

Dear parents and guardians:

To streamline communication and reduce emails and texts, we'll be using a mobile application called BAND. BAND gives us a safe and easy way to share everything related to our group in one place.

BAND Overview

BAND is a free, leading group communication app designed for teams to stay organized and get updates from one centralized place.

- Features: *Post and comment, calendars, photos, videos and files, chat, polls, live streams*

In our Band, you can check everything related to our group. (announcements, reminders, events, changes, payments, etc.) You can also post questions, share photos/videos, plan carpools with other parents, etc. **Please keep your app notifications ON and check updates/changes.**

Safety & Security

- Our Band is private, which means we can share group matters safely.
- You can connect with other members without sharing your phone number.
- BAND is a safe and secure platform. BAND collects minimum info (ex. name, date of birth, a phone number or email address, encrypted password, and device information) to provide the service. BAND never sells your personal data.
- **Please make sure your child enters their legal age in their profile** to take advantage of BAND's teen-specific safety features:
 - **Search:** Teen users aren't able to search other Public groups.
 - **Supervision:** You can connect your BAND account with your child's and become the Supervisor user. This way, you know which groups your child is part of. For more info, see this [guide](#).
 - **Ad filters:** You as a parent may see occasional ads on the app, but users under 18 don't see them.

Please join our group!

Download the BAND app from the Appstore/Playstore on your phone and complete the signup process. Then click the link on your phone or scan the QR code to join our group.
